

1. Which projects make use of the data?
Project B1: Modelling and controlling thermo-kinetic coating processes
2. Data format
 - Excelformat
3. Data size
 - 73 rows, 12 columns
4. Explanation of the variables
 - Experiment: Sequence number
 - Surface of substrate: Polished or rough
 - Location: Location of splats, in the middle or at the border
 - Number of splats: Big, small and total sum of splats
 - Relative number of splats: Big or small splats
 - V_e : Particle velocity in m/s
 - T_e : Particle temperature in °C
 - In: Flame intensity
 - W_i : Flame width
5. Source of the data
 - Real experiments
