Introductory Case Studies

- **Lecturers**: Prof. Dr. Jörg Rahnenführer, Dr. Philipp Adämmer, Dr. Andrea Bommert, M. Sc. Hendrik Dohme.
- **Module**: MD Req7 of the Master Study Programme Data Science.
- **Moodle**: Introductory Case Studies, Summer Semester 2021, LSF, 053018.
- **Mandatory for participation**: Enroll in the Moodle room by April 16, 2021 and be present in the first lecture on April 16, 2021.
- **Prerequisites**: It is highly recommended to first complete the Modules MD Req4 (Reading Course Probability), MD Req5 (Reading Course Inference), and MD Req6 (Reading Course Linear Models).
- **Reports**: You will analyze data in groups and then write individual reports. You will write 3 reports and you will have to pass all of them. We will provide a sample report. This class typically teaches you a lot, is a lot of fun, but also a lot of work.
